

Anthony Nyanumba Nyasente

Software Developer · Backend & Full-Stack

📍 Nairobi, Kenya 📞 +254 797 469 560 ✉ anthonynyasente@gmail.com 🌐 github.com/Nyanumba

PROFESSIONAL SUMMARY

Results-driven Software Developer and Applied Computing graduate with over a year of hands-on experience designing and deploying scalable backend and full-stack systems. Proficient in Python (Django, FastAPI, Flask), JavaScript (React, Node.js, Express), and PHP (Laravel), with a strong foundation in RESTful API development, database engineering, and real-time systems. Experienced in SaaS product development, cloud deployments, and cross-functional collaboration across distributed teams.

WORK EXPERIENCE

FastAPI Backend Developer (Contract) | Isentry Technologies

Aug 2025 – Dec 2025

Lagos, Nigeria · Remote

- ▶ Engineered scalable RESTful APIs using FastAPI, processing 10,000+ high-throughput requests with sub-200ms average response times across all core product features.
- ▶ Applied asynchronous route handlers, Pydantic validation, and dependency injection — reducing integration bugs by ~40% through enforced type safety and maintainable code structure.
- ▶ Delivered real-time collaboration features via WebSockets for 5,000+ concurrent users, integrated with React/Vue frontends using CORS and secure JWT authentication.
- ▶ Partnered with frontend and DevOps teams to achieve zero-downtime deployments across all production releases throughout the contract period.

System & Database Administrator Intern | NG-CDF Kenya

Apr 2025 – Aug 2025

Nairobi County, Kenya

- ▶ Oversaw critical database systems for a government body serving thousands of constituents, maintaining 100% data integrity with zero recorded security incidents over 4 months.
- ▶ Executed system administration tasks — including user account lifecycle management, real-time monitoring, and troubleshooting — supporting 50+ staff members daily.
- ▶ Streamlined ICT infrastructure operations, cutting system configuration turnaround time by an estimated 30% through process standardisation and documentation.
- ▶ Enforced a rigorous backup and patching schedule, achieving full compliance with government security protocols across all production systems.

IT Support Intern | NG-CDF Kenya

May 2024 – Aug 2024

Nairobi County, Kenya

- ▶ Supervised the organisation's LAN/WAN infrastructure across multiple departments, sustaining 99.9% uptime for all critical business operations over a 3-month period.
- ▶ Resolved 95%+ of hardware and software support tickets within the same business day, measurably reducing staff downtime across 50+ end-users.
- ▶ Reconfigured 20+ network devices (routers, switches, access points), eliminating recurring connectivity failures and improving overall data throughput.
- ▶ Directed user account and credentials management for 50+ staff, achieving full compliance with organisational security and access control protocols.

PROJECT EXPERIENCE

Team-IQ – Project Management SaaS Platform | Isentry Technologies (Contract)

Aug 2025 – Dec 2025

- ▶ Spearheaded backend development of a full-featured SaaS platform that scaled to 10,000+ active users, supporting task tracking, team collaboration, time logging, and workflow automation.
- ▶ Planned and built a modular FastAPI microservices architecture with RESTful endpoints spanning 6 core modules: Tasks, Projects, Workspaces, Comments, Notifications, and File Attachments.

- ▶ Executed real-time multi-user collaboration via WebSockets for 5,000+ concurrent users, enabling live task assignments and in-app mentions across distributed teams.
- ▶ Constructed hierarchical PostgreSQL data models with SQLAlchemy using CTEs and indexed views, achieving a 25% reduction in average query execution time.

Full-Stack Booking Platform | **Galalo's Park Resort (Contract)** Oct 2023 – Feb 2026

- ▶ Engineered a high-performance booking engine using React and Express.js/Node.js, cutting reservation completion time by ~35% versus the previous manual process and handling 500+ bookings per month.
- ▶ Integrated 3 payment channels — M-Pesa, Airtel Money, and credit card — with end-to-end encryption, achieving a 98%+ payment success rate across all transactions.
- ▶ Created a real-time availability calendar that synced room status instantly across the database, eliminating overbooking incidents entirely after go-live.
- ▶ Launched an automated notification system delivering booking confirmations via email/SMS within 30 seconds of payment verification, improving guest satisfaction.

E-Commerce Platform | **KCA University – Final Year Project** Sep 2024 – Mar 2025

- ▶ Constructed a full-stack e-commerce application with React and Django using a decoupled RESTful API architecture, reducing average page load time by 40% through optimised hooks and state management.
- ▶ Applied JWT authentication and Django's security framework to protect all user sessions and routes — recording zero security vulnerabilities across all testing cycles.
- ▶ Embedded an M-Pesa payment gateway with encrypted transaction handling, enabling end-to-end purchase flows for 100+ users during user acceptance testing.
- ▶ Created a normalised PostgreSQL schema via Django ORM covering users, products, and orders, with a fully responsive UI (Flexbox/Grid) validated across 10+ device types.

ICT Equipment Inventory System | **NG-CDF Nairobi** Jun 2025 – Aug 2025

- ▶ Planned and built an ICT asset tracking system in PHP and MySQL, digitising the management of 200+ equipment items previously tracked through manual spreadsheets.
- ▶ Delivered audit-ready reporting features that cut inventory reconciliation time by an estimated 50%, enabling faster compliance reviews for the ICT department.
- ▶ Enforced role-based authentication and granular access controls, ensuring only authorised personnel could view or modify sensitive asset records.

TECHNICAL SKILLS

Backend	Python · Django · FastAPI · Flask · PHP · Laravel · Node.js · Express.js
Frontend	React · TypeScript · Angular · HTML5 · CSS3 · Bootstrap
Databases	PostgreSQL · MySQL · MongoDB · SQLite · SQLAlchemy ORM
APIs & Auth	RESTful APIs · WebSockets · JWT · OAuth · Pydantic · JSON
DevOps & Tools	Git · GitHub · GitLab · Docker · Postman · VS Code · Vercel · Render · Railway · Linux

EDUCATION & CERTIFICATIONS

B.Sc. Applied Computing	KCA University	Graduated: Nov 2025
Backend Web Development	ALX Africa	Graduated: Nov 2025
Data Protection Law	Strathmore University	Graduated: Oct 2025

KEY ACHIEVEMENTS

SaaS Platform Lead	Led backend development of a SaaS platform serving 10,000+ active users with advanced project management features.
--------------------	--

Real-Time at Scale

Delivered real-time collaboration for 5,000+ concurrent users via WebSockets and FastAPI.

DB Performance

Achieved 25% reduction in query time by optimising SQLAlchemy models and implementing indexed views.

LANGUAGES

English — Proficient & Fluent **Swahili** — Native & Bilingual
